

The British (and Scottish) grading lists for 1979

GRADING DIRECTOR'S SURVEY

This year's National Grading List is based on performance during the twelve month period ending on 30th April 1979, except for those players, marked with an asterisk (*) where it has been necessary to include results at the previous twelve months average in order to base the grade on a minimum of 30 games. Players marked with a plus sign (+) played fewer than 20 games in the most recent twelve months (a minimum of 10 games being required) and such grades do not count towards title qualifications.

The foregoing also applies to the Combined Union Lists which do not now include the Scottish and Welsh players, separately graded.

Deleting the Scottish and Welsh players from last year's figures, players of 225 and over decrease from 8 to 11. Players between 213 and 224 decrease from 26 to 20 and those below 213 increase from 82 to 84.

Since our last list was published, J. D. M. Nunn has become our fourth international grand master. P. E. Littlewood has qualified for the title of British Master by virtue of norms obtained in the last four lists (1976-1979). Due to an oversight, J. J. Carleton was omitted from those qualifying for the title of Candidate Master last year when he obtained both norms required (one from the 1978 grading list and the other from his performance in the British Championships). Two further players, H. J. Plaskett and H. D. MacPherson, qualified as Candidate Masters, both obtaining a norm from this year's list and a tournament norm during the year. N.B. Miss E. Tranmer, shown as British Lady Master in the last year book, should have been shown as International Woman Master.

The title of 'Expert' has now been introduced by the B.C.F., commencing from the publication of this list as follows:

British Expert (BX)—held by players who achieve a B.C.F. grading of at least 200 in two consecutive lists (42 players at present).

Candidate Expert (CX)—held by players who achieve a B.C.F. grading of at least 175 in two consecutive lists (370 players at present).

N.B. These titles will only be held whilst

the player continues to retain the appropriate standard reflected in the list.

Although the number of players qualifying for these titles may seem at first sight excessive, it should be noted that the total number of players with titles (including masters, 494 at present) is slightly greater than 1% of the total number of players graded throughout the country.

Due to the introduction of these titles, the Combined Union List now includes all players of 175 and over, in order to include all qualifying players. The list includes 238 players of 185 and over compared with 224 B.C.F. players last year and the total number of players shown is 523 (638, including the National List).

The B.C.F. have also approved the introduction of 'Classes' of player directly related to current performance as follows:

Class 'A'—players with a current B.C.F. grade of 150 and over.

Class 'B'—players with a current B.C.F. grade of between 125 and 149 inclusive.

Class 'C'—players with a current B.C.F. grade of between 100 and 124 inclusive.

Class 'D'—players below 100.

The number of players in these categories last year were: 'A'—1524; 'B'—2617; 'C'—1858; 'D'—731 and the median of grading list performances was about 135.

I would like to thank all graders, particularly at Union level, for their hard work and valuable assistance, without which these lists would not be published. The number of players, games played and grading problems have increased dramatically since the introduction of B.C.F. grading, 25 years ago. A grading feasibility study is therefore being undertaken at the moment and although it is obviously impossible to canvass the ideas of every player, I would be interested to hear from anyone who feels they may have ideas to offer on the future of grading in the B.C.F.

BRYAN THREADGALL
Director of National Grading

THE SCOTTISH GRADING LIST 1979

Since the 1978 grading list was produced, Paul Motwani has won the World Under-17 Championship (Scotland's first chess world champion) and with it the title of FIDE Master. Danny Kopec has qualified for the title of Scottish Master and Stephen Swanson of Scottish Candidate Master.

Full list of titled players: International Master: D. N. L. Levy, C. W. Pritchett; FIDE Master: P. A. Motwani; Scottish Master: G. Bonner, D. Kopec and R. M. McKay; Scottish Candidate Master: M. Fallone, P. M. Jamieson and S. Swanson; Scottish Lady Master: Mrs. N. C. Elder.

	ELO	BCF		ELO	BCF		ELO	BCF
2400 (225) or over								
Pritchett, C. W. (IM: 225)	2435	(229)	Reid, A. (SC: 192)	2215	(202)	Abayasekera, R. F. T. (Polytechnic Rankin Park: 192)	2115	(189)
